Introduction to Beamer

Technical Writing Lab 2026

Vikram Mehra

Department of Computer Science

November 12, 2026

Introduction

Beamer is a LaTeX document class used to create presentations.

- Creates professional slides.
- Supports mathematical equations.
- Provides themes and color schemes.
- Supports animations and overlays.

Learning Objectives

After this presentation, we will understand:

1. Basic Beamer document structure.
2. Creating presentation slides.
3. Adding lists and equations.
4. Applying themes.

Mathematical Equation

Example of a mathematical equation:

$$a^2 + b^2 = c^2$$

Example of a summation:

$$\sum_{i=1}^{n} i = \frac{n(n+1)}{2}$$

Conclusion

Summary

Beamer provides a convenient way to create structured and professional presentations using LaTeX.

Thank You!
